

Project Status Report

Project Name	Lockheed Martin #2: Digital Twin Simulation		
Date	1/25/2020	Created By	Matthew Janc
Status RAG	Time	Team Member Participation	N/A
Progress Last Week	This week in addition to continuing to look at the repository we began developing more specific requirements for what our tool(s) need to accomplish. By fleshing these out on our own, we believe we will save time, understand what we need to do better, and be able to get to work on track with our schedule.		
To Do This Week	We have a meeting with the LM team on Tuesday, we are hoping they have done what's required so we can start our own branch and get developing. They have modified the requirements a little so hopefully we get clarity on that as well. But after tuesday is when we should be able to start making changes.		
New Issues, Risks, Blockers	N/A		
Updates on Issues, Risks, Blockers Raised Last Week	N/A
