

Project Status Report

Project Name	Lockheed Martin #2: Digital Twin Simulation		
Date	10/15/2020	Created By	Matthew Janc
Status RAG	Time	Team Member Participation	N/A
Progress Last Week	Over break and last week we worked to get access to the repo and wiki page. We can now look at the code! And read about each aspect of the project. We also had fun team bonding during one meeting over break. We met with the LM team and created a game plan for the next few weeks.		
To Do This Week	We have another meeting with our technical lead to take a deep dive at the code. Before that meeting we are tasked with looking and trying the code for ourselves. We are all excited for this stage. We will begin implementation by the end of the month. After this week's meeting we hope to have a better idea of our task as well as the next steps going forward.		
New Issues, Risks, Blockers	The semester is going to move faster than we think. We have to be diligent and get right to work, not wasting time as our time is already limited.		
Updates on Issues, Risks, Blockers Raised Last Week
