

Project Status Report

Project Name	Lockheed Martin #2: Digital Twin Simulation		
Date	2/1/2021	Created By	Brian Jackman
Status RAG	Time	Team Member Participation	N/A
Progress Last Week	This week we dove deeper into the code base learning more about what we will need to do. We did this by developing test cases for the program and analyzing the outputs given. We also resolved some issues we were having with our development environment.		
To Do This Week	We have a meeting with the LM team on Tuesday, we are hoping they have done what's required so we can start our own branch and get developing. But after Tuesday is when we should be able to start making changes.		
New Issues, Risks, Blockers	N/A		
Updates on Issues, Risks, Blockers Raised Last Week	We still need to be given access to a branch so we can get a better start working on the program.
