

# Project Status Report

Project Name	Lockheed Martin #2: Digital Twin Simulation		
Date	10/15/2020	Created By	Matthew Janc
Status RAG	Time	Team Member Participation	N/A
Progress Last Week	This past week we worked hard at planning how our semester will wrap up and what winter break /next semester is going to look like. We met with our technical and project lead to hash out requirements and think about the next steps over winter break.		
To Do This Week	This week we will be working hard to finalize the deliverables (Requirement's document is complete, we are working on the Gantt Chart and WBS) we need to turn in by the end of the semester. We will also all be taking the final for this course. Lastly, we need to make sure we are doing our part to ensure that we can get access to gitlab/repo as soon as possible (Issue Highlighted Below).		
New Issues, Risks, Blockers	We are eager to see the code, however we haven't had access yet. We are communicating with IT and our project lead to get our eyes on the repository as soon as possible. That way we can begin answering a lot of questions ourselves.		
Updates on Issues, Risks, Blockers Raised Last Week	None
