

Project Status Report

Project Name	Lockheed Martin #2: Digital Twin Simulation		
Date	11/16/2020	Created By	Owen Fulton
Status RAG	Time	Team Member Participation	N/A
Progress Last Week	Finished project video filming. Also had tag up meeting with Jonathan Klingel in order to begin to get access to code base. Began to work through requirements with him.		
To Do This Week	Begin looking over code base wiki to understand how model works. Alongside this, begin filling out high level requirements for the class repo.		
New Issues, Risks, Blockers	In meeting with Klingel, he was very vague on outlining requirements for the project. As we have yet to see the actual project and how it works, we can only write down high level requirements at this point.		
Updates on Issues, Risks, Blockers Raised Last Week	None
