

Project Status Report

Project Name	Lockheed Martin #2: Digital Twin Simulation		
Date	3/1/2021	Created By	Brandon Roemer
Status RAG	Time	Team Member Participation	N/A
Progress Last Week	<p>Last week team 1 continued to make progress on their tasks by fixing a few issues with finding functions and have fixed the issue with incorrect commits.</p> <p>Team 2 still must fix this issue with the commits. Team two has created some test code, continues to debug the main task code, and has fully fleshed out the limits and requirements of the old code.</p>		
To Do This Week	<p>This week we will continue work towards the main task of integrating both models back into the code. In order to do so team 1 will continue with small bug fixes. Many of which can be used in teams 2 code so that they can catch up to team 1 faster.</p> <p>We will also have our sponsor meeting this Tuesday to discuss any blockers</p>		
New Issues, Risks, Blockers	<p>Team 1 is having some issues regarding the navigation of the AST. We believe this to be a small problem that will be resolved shortly.</p> <p>Outside of this issue we currently have no blockers.</p>		
Updates on Issues, Risks, Blockers Raised Last Week	<p>Last week we had the issue with incorrect commit messages; However, team 1 has found a solution that team 2 now needs to implement as well.</p>
